Danger to drinking water if even small quantities leak into the ground.
 Water hazard class 2 (German Regulation) (Self-assessment): hazardous for water
 Rinse off of bigger amounts into drains or the aquatic environment may lead to increased pH-values. A high pH-value harms aquatic organisms. In the dilution of the use-level the pH-value is considerably reduced, so that after the use of the product the aqueous waste, emptied into drains, is only low water-dangerous.

SECTION 13: Disposal considerations
